Subject: Request permission to conduct control study

Dear Madam,

I represent team **chAI**, which aims to compete at **Semantic Search AI Hackathon** powered by **Cohere**. We have developed an AI-based product to aid teachers in evaluating answer sheets consisting of subjective-type answers.

As an alumnus of this reputed school, I am grateful to be a part of its rich educational culture and dedication to finding solutions to existing problems in the world. On that note, I would like to request permission to conduct a controlled experimental trial of our product under the guidance of **Mrs. Soubhagya G H**, faculty for computer science. Through this trial, we would like to assess the performance of this product and its reliability in a practical setting.

I assure you that the code of conduct will be strictly followed during this experiment, and a copy of the final assessment report of the experiment will be shared with the school.

Thank You  
Yours faithfully  
Aryan Amit Barsainyan
